Education

August 2012 | May 2016
BS in Computer Science, *University of Michigan*, GPA: 3.9, *Ann Arbor, MI*.

Work Experience

Aug 2016 – Present
Software Engineer, *Google*, Mountain View, CA.
- Contributing to the open source Android platform as well as proprietary Google apps with a focus on the Android telephony stack (calls, data, and SMS). This work involves designing, implementing, and testing features for the entire Android ecosystem.

May 2017 – Present
Co-writer, co-producer, *Baked! The Musical*, Chicago, IL.
- Writing and producing a new musical which is debuting at the Chicago Musical Theatre Festival 2020.

Skills

Programming
Android, Java, C++, Python, HTML, Javascript, CSS

Tools
Git, Gerrit, Linux command line tools

Projects

Tech Art, *NodeJS, Github Pages, AWS ec2*.
Various personal projects combining technology and art including a search engine which sends texts and waits for answers, an online collection of smart phone poetry, and a plaid generator.
github.com/jminjie

Commits.to, *NodeJS*.
I'm one of a small team of individual contributors on Commits.to, a community project which helps people be more accountable.
https://github.com/commitsto/commits.to

Plugins for Hain, *NodeJS*.
Hain is an extensible alt-space launcher for Windows. I contributed to the project, and also built a couple of plugins which have over 10,000 installs.
https://github.com/jminjie/hain-plugin-roll

Personal blog, *Flask*.
A personal blog built from scratch in Python on an Amazon ec2 instance. I try to post updates to this and add features every month, and also accept submissions from a group of friends.
